### Why do you want to join the Board of Directors?

As a member of our community, I believe it's my responsibility to be involved in activities that help shape our future leaders. I am passionate about activities that influence diversity of thought, exemption of bias and support driving and delivering a best in class program for families. I know I possess the tools to support the board and the Hockey community deliver amazing outcomes in the coming years. I would love the opportunity to work with these amazing contributors to support the continued growth of our sport.

### What do you hope to achieve while sitting on the Board?

I would love to build relationships that will benefit all kids in our program. I'm very interested in the Director of Managers or Director of Coaches roles as the consistency we establish across all programs will directly benefit the kids in the programs. I hope my legacy will be delivering a consistent set of tools that will help this upcoming season and for seasons to come. I would encourage collaboration across directors to make sure that the view being established is grounded in insights gathered from different perspectives to support all managers or coaches across all age groups. I love our community and the relationships I've made so far, this would be a great opportunity to create more space for integration across director roles to deliver a solid platform for our kids.

### What makes a great Board member?

I believe I am a collaborative, effective contributor. I pride myself on the brand I've built of "getting it done" and would see this as an asset to this position. I love people and I love developing documentation to set us up for success. My current role at TELUS has me supporting a National Team delivering on a \$240M portfolio. To be effective, I need to have the right communication, team engagement and organization. I would love to take the tools I use in my role daily and leverage them to make a meaningful contribution in my community. I am excited about this opportunity.
